```

The working set limit was 1050 pages.
19158 bytes (38 pages) of virtual memory were used to buffer the intermediate code.
There were 30 pages of symbol table space allocated to hold 401 non-local and 0 local symbols.
46 source lines were read in Pass 1, producing 27 object records in Pass 2.
10 pages of virtual memory were used to define 9 macros.

```
